

## School teachers earning £65,000 or more in state funded schools in England

The latest statistics on the salaries received by teachers were published in July 2015 in Table 8 of the [‘School Workforce in England: November 2014’](#) statistical first release.

The statistics show there were 12,845 full and part-time teachers<sup>1</sup> earning a gross full-time equivalent annual salary (including any additional allowances) of £65,000 or more in November 2014. The following table provides a breakdown of those teachers earning £65,000 or more by their grade and by which school type within phase they are working in.

	Head Teachers	Deputy Headteachers	Assistant Headteachers	Classroom Teachers	All Teachers
LA maintained nursery and primary schools	3,650	265	50	85	4,050
Primary academy schools	880	45	10	15	950
LA maintained secondary schools	1,230	930	230	50	2,440
Secondary academy schools	2,045	1,545	310	240	4,140
Special schools and LA employed staff	845	160	165	95	1,265
<b>England Total</b>	<b>8,650</b>	<b>2,945</b>	<b>765</b>	<b>485</b>	<b>12,845</b>

LA = local authority

Academy schools include free schools

Figures are rounded to the nearest 5

<sup>1</sup> In the published table this figure appears as 12.9 thousand due rounding.

The information included in this release is taken from the November 2014 School Workforce Census. The Census collects detailed information on teachers (and other school staff) working in all state funded schools in England. The table presents data on teachers' role and pay that schools and local authorities provided to the Department. Further information on the School Workforce Census collection can be found in the background notes in the statistical release.

Details of the different roles and pay ranges is available [here](#).
